Subject: Re: Spam Patent Application

Hi Jeff,

I have looked at the fax now. A few more comments, then I think we are done ✓  
(you don't need to send it to me once these are corrected, but I think it is  
ready to  
file then.)

page 14 "is preferably a generated pseudorandom function that uses" -> ✓  
"is preferably generated using a pseudorandom function, e.g., "

page 14 "other number generators" -> "other methods of generating identifiers" ✓

claim 1: I am concerned that this would not be allowed, given Gabber et al.  
What do you think? (not required)

fig 2 "one time pad" -> "a key or pad" ✓

Cheers,  
Markus
